EXPERIENCE

ORACLE FINANCIAL SERVICES SOFTWARE - ORACLE INDIA

Bengaluru

Staff Consultant -

(October 2022 - Present)

- Led development of a modern MSME banking portal by translating Figma designs into reusable Oracle JET components, enabling scalable digital banking workflows.
- Improved platform performance by troubleshooting third-party API interactions and removing duplicate UI compilation, reducing API latency ~50% and build time by ~50%.
- Troubleshot onsite banking application issues by resolving missing client-side configurations, restoring system functionality within the same day and minimizing downtime.
- Created Swagger-based API documentation to improve API visibility and support seamless integration for internal and partner development teams.
- Partnered with product managers, backend engineers, and enterprise clients to deliver customized banking UI solutions aligned with Oracle product architecture.
- Built an AI-powered internal knowledge assistant using LLMs and vector search, enabling engineers to query technical documentation via natural language.

Tech: JavaScript, KnockoutJS, Oracle JET, HTML, CSS, Figma, Nodejs, Java

COGNIZANT

Bengaluru

Full Stack Developer

(January 2020 – October 2022)

- Developed credit card application workflows using React and Node.js, converting lengthy forms into multi-stage flows with save-resume capability, improving engagement in UK A/B testing.
- Built Node.js/Express APIs for credit card application processing, implementing validation and transformation layers to ensure reliable integration with downstream credit systems.
- Collaborated with field agents to troubleshoot application issues and guide application workflows, enabling smoother customer onboarding.

Tech: React.js, Node.js, Express.js, JavaScript, Redux

EDUCATION

KIIT BHUBANESWAR

Bhubaneswar

B. Tech in Electronic & Telecommunication

July 2015 - Jun 2019

SKILLS

- **Languages:** Javascript, HTML, Java, Python
- **Core Concepts:** Data Structures, Machine Learning, RAG, Prompt/Context Engineering
- **Databases:** MySQL, MongoDB, Firebase, Pinecone(vectorDB)
- **Cloud:** Firebase, Heroku, Cyclic
- **Frameworks:** Reactjs, React Native, Flask, Expressjs, Nodejs, Git, Axios, LangChain, openAI API

PERSONAL PROJECTS

Langgraph-cassette (2025)-

- Built an open-source Node.js framework for reproducible LLM testing by caching external API responses and eliminating token usage, reducing development cost by ~50%.

Won Hackathon by [sidetrip.ai](#) (2025)-

- Developed LLM-powered GitHub repository chatbot supporting semantic search and contextual interaction with repository content.

Organized Short Content Media Platform (2024)-

- Developed a short-form content platform scaling to an early user base of 20–30 users.

HealthCare-AI On FingerTip (2022) -

- Led development of an AI-driven healthcare monitoring prototype, integrating ML models for vitals tracking and X-ray analysis, ranked Top 100 in India 5G Hackathon.
